The Journal of Systems and Software

Contents Volume 42

Contents

Editor's Corner
SAP aligning IS with the enterprise takes on a whole new meaning
Robert L. Glass 1

Measuring the comprehensibility of Z specifications
Kate Finney, Keith Rennolls and Alex Fedorec 3

How to write comments suitable for automatic software indexing
Paolino Di Felice and Goffredo Fonzi 17

A classification scheme for software modules
Robert C. Shock and Thomas C. Hartrum 29

"Paramita wisdom" password authentication scheme without verification tables
Yu-Yii Chen and Jinn-Ke Jan 45

An adaptive exponentiation method
Der-Chyuan Lou and Chin-Chang Chang 59

Thread migration and its applications in distributed shared memory systems
Ayal Itzkovitz, Assaf Schuster and Lea Shalev 71

Effort estimation and prediction of object-oriented systems
P. Nesi and T. Querci 89

Editorial
Guest editors' introduction: special issue on software engineering and knowledge engineering
D.E. Cooke and J.E. Urban 103

A quantitative approach for assessing the priorities of software quality requirements
X.F. Liu 105

An empirical study of the LSS specification toolkit in use
D. Robertson 115

Specifications in software prototyping
Luqi, C.K. Chang and H. Zhu 125

Testing object-oriented programs: From formal specification to test scenario generation
K.H. Chang, S.-S. Liao, S.B. Seidman and R. Chapman 141

An integrated environment for reuse reengineering C code
G. Canfora, A. De Lucia and M. Munro 153

Recombining changes to software specifications
V. Berzins 165

Using design abstractions to visualize, quantify, and restructure software
B.-K. Kang and J.M. Bieman 175

Editorial
Guest editor's corner. Real-time active databases: theory and practice
K.Y. Lam 189

DRDB: Towards distributed real-time database services for time-critical active applications
S.H. Son, R.C. Beckinger and D.A. Baker 193

Transaction management mechanisms for active and real-time databases: A comprehensive protocol and a performance study
P. Konana and S. Ram 205

Buffer management in real-time active database systems
A. Datta, S. Mukherjee and I. R. Viguier 227

Transaction processing in distributed active real-time database systems
. Ulusoy 247

Real-time event control in active databases
L. Bkgaard and J.C. Godskesen 263

An analysis of lock-based and optimistic concurrency control protocols in multiprocessor real-time databases
A. Chiu, B. Kao and K. Lam 273
